First International UQUAM Workshop

From April 28 to May 2, 2014, the First International UQUAM Workshop will take place at VIU.

The conference will be the first annual research retreat within the framework of UQUAM (Ultracold Quantum Matter). Ca. 85 participants will meet to discuss latest scientific trends, results and developments in the field of ultracold quantum gases and will identify novel research opportunities.

Invited speakers:

Nigel Cooper (University of Cambridge)

Eugene Demler (Harvard University)
Zoran Hadzibabic (Cambridge University)

Benjamin Lev (Stanford University)

Mikhail Lukin (Harvard University)

Roderich Moessner (MPI for the Physics of Complex Systems)

Belén Paredes (CSIC, Institute for Theoretical Physics)

Anatoli Polkovnikov (Boston University)

Achim Rosch (University of Cologne)

Christophe Salomon (Laboratoire Kastler Brossel)

A full program of the workshop is available here
