Summer Institute on Ageing
June 13-17, 2022
Venice International University
Isola di San Servolo, Venice
VIU Summer Institute on Ageing

Global Ageing: Low- and Middle-income Country Challenges

June 13-17, 2022

Venice International University

Scientific Coordinator:

Agar Brugiavini
Ca’ Foscari University of Venice; Venice International University

What is it?
The Summer Institute provides students and early-career researchers with a multidisciplinary and rigorous understanding of the ageing process, ranging from some basic notions of the medical and epidemiological literature, to key concepts in the economics and sociology of ageing. A special focus is the use of large micro-data sets, from the international family of health and retirement studies (SHARE, HRS, ELSA, CHARLS, MHAS...).

Who is it for?
Graduates, PhD students and post-doc scholars in economics, statistics, social sciences and medicine, but also professionals active in the field of ageing.

What are the main activities?
- Presentations of leading scholars from the fields of biomedicine, geriatrics, genetics, epidemiology, as well as economics, health economics, public health, psychology, demography and sociology;
- Hands-on sessions: presentation of the survey data on ageing available to the scientific community focusing on datasets such as SHARE;
- Poster sessions and other activities: discussing the participants’ research with the senior scholars;
- Interactive sessions, such as “tutoring sessions”, aimed at giving participants the opportunity to discuss their own research ideas with senior speakers in individual or small group meetings.

Who is the faculty?
The following scientists and researchers will contribute to the 2022 Summer Institute on Ageing:

Mauricio Avendano, University of Lausanne & Harvard University, CH
Axel Boersch-Supan, Max Planck Institute for Social Law and Social Policy, DE

As the COVID-19 pandemic is ongoing, VIU will continue to monitor the situation. Should the COVID-19 situation prevent international travel or the confirmation of the program on campus as scheduled, other practicable solutions will be evaluated. Applicants and confirmed participants will be informed of any changes.
Lisa Berkman, Harvard T.H. Chan School of Public Health, USA
Agar Brugiavini, Ca’ Foscari University of Venice & Venice International University, IT (Scientific Coordinator)
Luigi Ferrucci, National Institute on Ageing, USA
John Giles, World Bank Group, USA
Mickael Hiligsmann, Maastricht University, NL
Arie Kapteyn, University of Southern California, USA
Hans-Peter Kohler, University of Pennsylvania, USA
Jinkook Lee, University of Southern California, USA
Stefania Maggi, Institute of Neuroscience, National Research Council of Italy, IT
Jürgen Maurer, University of Lausanne, CH
Owen O’Donnell, Erasmus University Rotterdam, NL
Giacomo Pasini, Ca’ Foscari University of Venice, IT
Guglielmo Weber, University of Padova, IT

What will you learn?
Double learning outcomes: on one hand, participants will gain more insight into the recent advances of the ageing process from a theoretical and practical point of view, especially with regard to key ageing challenges in low- and middle-income countries (LMICs); on the other hand participants will take part into a “hands-on” session that will teach them how to use the data behind the research effort in this area. Hence participants will gain subject-related competences in handling large data sets on ageing, which do contain relevant information on health and economic conditions.

Data sets
Population survey data on ageing around the world such as SHARE and its international sister surveys, including related data from LMICs.

What’s special about the Institute?
Attending the school means developing transversal competences since the approach is multidisciplinary, and those who have a specific economic or sociological background will know more about medical advances in ageing research, learning the specific language in which MDs deal with these issues as well. High-level policy makers or officials who may also take part in this program will be able to learn how to connect issues between the health dimension of ageing and the economic dimension of ageing.

What’s the relevance of the school?
Population ageing is a major global concern. Ageing processes are complex and involve several dimensions, from the health dimension to the socio-economic context. In order to achieve a better understanding of how to ensure healthy and successful ageing around the world, it is crucial to take account jointly of these different dimensions, and to develop health systems and welfare models that enhance the human development of ageing populations, including in resource-poor settings. Future generations of researchers will have to address the challenge of ageing with a multidisciplinary background, both in their academic career and in operational activities, and policy making as well. This is true also for firms (and managers) which will have to adjust to an ageing work-force and to make the best of the skills that these workers will offer. It is clear that this research agenda has a huge impact on public finances, ranging from health care and long term care spending, to pensions and Social Security.

Application procedure and costs
The Program will admit from a minimum of 12 to a maximum of 30 participants.

Applicants from VIU member universities: € 200 incl. VAT
Other applicants: € 400 incl. VAT

The fee will cover tuition, teaching materials, lunches in the VIU cafeteria and social events.
Student participants will be responsible for covering their own travel expenses to and from Venice, local transportation, and evening meals.

2 full scholarships available for students coming from Low-Income Countries; other scholarships may be available to cover part of the fee.

**Accommodation on campus:**
Venice International University offers its support to book accommodation on San Servolo Campus, in multiple rooms with other participants for the duration of the Summer School.

**On-line applications**
Available from January 27, 2022 on the VIU website. Applicants must submit: the Application form, a brief research statement including candidate’s interests and a curriculum vitae with photo.

**Deadline:** February 25, 2022
Admitted candidates will be notified by March 7, 2022. Payment of the tuition fee by March 13, 2022.

**Credits**
Number of ECTS equivalence: 2
A Certificate of attendance will be issued at the end of the course.

**Website and application form**

**Venice International University**
Venice International University is a consortium of 20 universities, representing 14 countries throughout the world. The mission of VIU is to foster cooperation among VIU member institutions while facilitating the exchange of knowledge and ideas, by developing, promoting, and organizing joint academic, research and training/capacity-building program. Students from non-member universities may participate in selected academic programs. The academic programs at VIU are distinguished by a markedly interdisciplinary approach to the topics, and by the international perspectives that the participants contribute to the discussions. The VIU campus is on the island of San Servolo in Venice, Italy.

**Co-organizers and Partners**
The Summer Institute on Ageing is an initiative of VIU in partnership with its member universities and institutions Ca’ Foscari University of Venice, the National Research Council of Italy, the University of Lausanne, and the University of Padova.

This event is supported by the Swiss Agency for Development and Cooperation (SDC) and the Swiss National Science Foundation through the Swiss Programme for Research on Global Issues for Development (r4d programmed) by the grant “Inclusive social protection for chronic health problems” (Grant number: 400640_160374 PI: Jürgen Maurer). For further details on the initiatives see: [http://www.r4d.ch](http://www.r4d.ch) and [https://r4d-ncd.org](https://r4d-ncd.org)

The event is co-financed by the European Union’s Horizon 2020 project “SHARE-COHESION” (Grant number: 870628)
